

## Harding Dam water treatment plant

### Industrial construction and non process infrastructure

This project involved the design and construction of a new water treatment building and processing equipment on the Harding River Dam, 30 kilometres east of Karratha.

Decmil partnered with O'Donnell Griffin (ODG) and the Water Corporation for this project which proved to be a remarkably efficient method of project delivery.

Decmil was responsible for the civil and building works worth about \$20 million and ODG completed the process construction works under Decmil's co-ordination and management system.

CLIENT:	Water Corporation
LOCATION:	Harding Dam, 30 km east of Karratha, Western Australia
EPCM:	O'Donnell Griffin
CONTRACT VALUE:	\$20 million
START DATE:	October 2002
COMPLETION DATE:	September 2003
