

Jabiru, Ranger Mine Pit 3 expansion

Industrial construction and non process infrastructure

The Ranger Mine and associated town of Jabiru are about 230 kilometres east of Darwin, surrounded by the Kakadu National Park.

This project which involved the detailed design, supply, installation and commissioning of a new tyre store warehouse, day services building, tray truck repair area, diesel storage tank area with incorporated piping and sewerage treatment plant.

In addition to this new work, Decmil upgraded existing infrastructure including installing a 5 tonne monorail crane, an HV wash down facility and a new oil water separator as well as managing the construction and commissioning of the new mine offices to be supplied and installed by AUSCO Building Systems Pty Limited.
