

## Newman hub stage 2 EPCM site facilities and Jimblebar EPCM

Industrial construction and non-process Infrastructure

Decmil was contracted to design and construct Stage 2 EPCM facilities (1200 square metre workshop) at Newman Hub which included temporary offices and ablutions for the Car Dumper, Train Load-out, and Stockyard and Security Post.

The works also include the design, supply, installation, termination, testing and commissioning of all building services including electrical, communications, hydraulics, sewage and air conditioning. Decmil also undertook all necessary auxiliary and temporary works including accessories and incorporation of all miscellaneous materials, minor parts and other items necessary to complete and commission the works ready for occupancy.

In addition to the above works, Decmil was awarded Separable Portion 9, as a variation to the original contract, to decommission, remove, relocate and re-install 11 temporary buildings from Ore Body 18 EPCM facility and Ore Body 25 Kurra Village to the Jimblebar mine site which is owned by BHP Billiton.
