

Samson Brook Chemical Dosing Plant

Industrial Construction and non process infrastructure
Government

This project involved the construction of a chemical dosing facility including detailed earthworks and construction of buildings in pre-cast panels.

The design of the plant ensured that it was capable of accommodating highly technical equipment for the processing of water from the Waroona Dam.

CLIENT:	Water Corporation
LOCATION:	Waroona Dam, Waroona, Western Australia
CONTRACT VALUE:	\$3.2 million
START DATE:	October 2003
ESTIMATED COMPLETION:	August 2003
