

Yandi Administration Building

Industrial construction and non process infrastructure

The scope of work included the design, engineering, fabrication, manufacture, supply, transportation, installation, commissioning, site works and services for the Junction South East Expansion Project at the Hamersley Iron Yandi mine.

Works included:

- Construction of a new 2400 square metre administration office
- Supply and installation of a new waste water treatment plant (WWTP)
- Removal of an existing administration office.

All new buildings were constructed complete, ready for occupancy and operation and included all necessary auxiliary and temporary works, accessories and miscellaneous materials, minor parts and all other items required to complete and commission the works.
