

Finucane Island Building Complex

Non-Process Infrastructure

This project consisted of works on two of BHP Billiton's sites in Port Hedland, the Finucane Island Buildings Complex and the Nelson Point Central Control Room Building and Ore Car Repair workshops.

The scope of work includes:

- Construction of a new Green Star buildings complex at Finucane Island that included administration offices, health and safety facilities, staff amenities, workshops and warehouse, a vehicle refuelling facility and a light vehicle washing bay;
- Construction of a new building at Nelson Point to house the new state-of-the-art port and rail operations Central Control Room including general offices, a meeting room and amenities. This building was constructed as a cyclone safe haven, complying to Importance Level 4 requirements;
- Installation of various items of company supplied railway maintenance mechanical equipment and the construction of minor civil and structural works in and adjacent to the existing Ore Car Repair Workshop at Nelson Point.
