

# Kandama Village

## Accommodation and Non-Process Infrastructure

Decmil Australia was awarded the contract for the Design and Construct of the accommodation village as part of FMG’s Christmas Creek Expansion. A new 800 person village is to be built to accommodate the permanent workforce for the mine operations. Decmil is managing the overseas manufacture of two storey accommodation units for this project. When complete this facility will set a benchmark in design not seen before in Western Australia.

Improving on traditional Central facility design was key to creating this resort style village. This design provides;

- Communal dining facilities and tavern which has been located adjacent to the sports oval, which doubles as a sports viewing location;
- A 100 seat dedicated cinema;
- An external BBQ adjacent to some of the sporting facilities;
- Sports facilities include a three lane lap pool, tennis/basketball court, gym, indoor cricket, golf driving range, and a sports oval.
